Springboro, Ohio - June 7, 2023:

Accelevation LLC is pleased to announce the acquisition of a new business in their holding group. Instor is a data center equipment integrator, focused on low-voltage electrical equipment build out and installation. They create wholesale colocation, lab and data center spaces from whitespace to operation-ready, reducing overall build time and project costs. Instor is headquartered in Fremont, CA, with an additional European headquarters in Dublin, Ireland.

Accelevation President, Michael Rubiera, said, “We are thrilled to welcome Instor to the Accelevation portfolio of innovative companies. Combining Instor’s 40+ sales and project management professionals to our Accelevation portfolio creates one of the most comprehensive and all-encompassing solution providers of data center products and installations in the world. We couldn’t be more excited about the possibilities and growth this acquisition provides.”

Instor CEO, Jack Vonich, said, “We are proud of our track record as an industry leader offering comprehensive solutions from concept to completion. Accelevation’s strong culture as well as their vertically integrated manufacturing capabilities impressed us, and we look forward to working together to drive the next phase of success for the company.”

About Accelevation, LLC

Accelevation is a vertically integrated group of manufacturing companies serving the data center, electric vehicle and robotic markets. The organization’s mission is to build businesses and work cultures that positively impact employees, their families, their community and their customers. At it’s core, Accelevation understands that it is their responsibility to plot a course for a more mindful way of doing business.
